

Decision-time distribution by AI type (12230 valid games, Rule-Based vs 1SGS)

Mann-Whitney U test: $p < 0.000001$ (significant)

Mean decision time per game (ms, symlog scale)

10^{-1}

10^{-2}

0

Note: 9150/12230 Rule-Based games measured exactly 0ms — below timer resolution for such fast per-move decisions (see Methodology).
